400A: Case heater fan assy revised

**Extended Description:**

Replaces Rosemount 655142

This case heater assembly is compatible with the older version of Rosemount 400A (compatible with any Flame Safety Board [for the AC power connection] but only compatible with Main Electronics Boards that have the 8 Pins DIP socket in the lower right hand corner of the board [this supplies the  $\pm 12\text{VDC}$  to the electronics]). Wired for 120 vAC / 60 Hz (240 vAC available upon request).

Benefits: [1] It has less wires to contend with as the single pair of AC wires power the heater and the fan. [2] assembly qualifies for a core-trade-in credit.
