400A: Burner contact (electrode) kit

Extended Description:

Replaces Rosemount p/n: 073674

a.k.a., "hot dog on a stick." This burner contact assembly kit contains one of contact & one of instruction sheet. Contact assembly screws in to the lower portion of the burner, protruding in to the chamber, and lays up against the metal jet tube to make an electrical connection to measure ion current.
